

Big

Balsam Bash

Join the Fight Against This Invasive Plant!

Himalayan Balsam is an Invasive Non-Native Species and a pest plant. It is present in this area and likely to spread, finding niches away from the River Wye, in gardens, woodlands, orchards, along our paths and bridleways. It smothers native plants, alters natural habitats, forces out local wildlife and impacts on our own enjoyment of the countryside.

Help us to stop the spread by joining our Big Balsam Bash! Everyone is welcome.

Group Name:

Date/Time:

Meeting Point:

What to bring: Please wear protective clothing i.e. trousers, long sleeved tops and gardening gloves as you may be working amongst nettles or brambles. The terrain might be rough and uneven so do wear sturdy shoes. You may also wish to bring a bottle of water, light refreshments and sun cream.

For more information visit/call:

Please do spread the word about stopping the spread!
